Casablanca, Morocco | lahoucineazmoud@gmail.com | +212 637 703 384 | https://github.com/Moody-0x01

Education

1337 coding school — Casablanca, Morocco
Computer science, Common core, multiple project related to system programming, Linux, socket programming and web — 2024-Present

FLSH — Casablanca, Morocco
English studies — 2021-2022

Ibn Al Haytham — Casablanca, Hay Hassani
High school degree, physics — 2017-2020

Experience

Hztech — Casablanca, Sidi Maârouf
Full Stack Developer [Intern] — 2022 May– 2022 September

- Developed and launched the official company web application using Golang, Svelte, and SQLite, optimizing database queries to ensure smooth data persistence.
- Engineered the user interface for a dedicated electronic software solution, focusing on component reliability and clean data integration.

projects

Dusk | [https://github.com/Moody-0x01/Dusk]:
An API for retrieving images from Wallhaven, implemented primarily in Python with an HTML-based interface.
clippy_hook | [https://github.com/Moody-0x01/clippy_hook]:
Designed and developed clippy_hook, an X11 clipboard-listening automation app that detects copied media links—including YouTube, SoundCloud, magnet URIs, and direct media URLs—and automatically dispatches downloads via yt-dlp, with a high-performance Rust core and supporting Python/Shell/Makefile tooling
webserv | [https://github.com/Moody-0x01/webserv]:
Built a high-performance web server in C++ with support for core HTTP request handling, routing, and static content delivery, applying system-level programming practices to improve reliability, modularity, and maintainability.
